Park believes that an evaluation of its ongoing operations would be difficult if the disclosure of its operating results were limited to accounting principles generally accepted in the United States of America ("GAAP") financial measures, which include special items, such as lost tax deductions and restructuring charges. Accordingly, in addition to disclosing its operating results determined in accordance with GAAP, Park discloses non-GAAP measures, including Adjusted EBITDA, and operating results that exclude special items in order to assist its shareholders and other readers in assessing the Company's operating performance, since the Company's on-going, normal business operations do not include such special items. The detailed operating information presented below includes a reconciliation of the non-GAAP operating results before special items to earnings determined in accordance with GAAP and a reconciliation of GAAP pre-tax earnings to Adjusted EBITDA. Such non-GAAP financial measures are provided to supplement the results provided in accordance with GAAP.

Park Aerospace Corp. develops and manufactures solution and hot-melt advanced composite materials used to produce composite structures for the global aerospace markets. Park's advanced composite materials include film adhesives (undergoing qualification) and lightning strike materials. Park offers an array of composite materials specifically designed for hand lay-up or automated fiber placement (AFP) manufacturing applications. Park's advanced composite materials are used to produce primary and secondary structures for jet engines, large and regional transport aircraft, military aircraft, Unmanned Aerial Vehicles (UAVs commonly referred to as "drones"), business jets, general aviation aircraft and rotary wing aircraft. Park also offers specialty ablative materials for rocket motors and nozzles and specially designed materials for radome applications. As a complement to Park's advanced composite materials offering, Park designs and fabricates composite parts, structures and assemblies and low volume tooling for the aerospace industry. Target markets for Park's composite parts and structures (which include Park's proprietary composite SigmaStrut<sup>TM</sup> and AlphaStrut<sup>TM</sup> product lines) are, among others, prototype and development aircraft, special mission aircraft, spares for legacy military and civilian aircraft and exotic spacecraft. Park's objective is to do what others are either unwilling or unable to do. When nobody else wants to do it because it is too difficult, too small or too annoying, sign us up.
